

# AQUA SALVEO®

TASTELESS - ODOURLESS

**A water purification product for water tanks on yachts and all boats (in fact, any "fresh" water) that is totally effective, odourless, tasteless AND beneficial for your well-being.**

*(Gentle on all plumbing - unlike bleaches & chlorine)*

**Aqua Salveo** water disinfectant was first and foremostly designed to disinfect contaminated and polluted human drinking water. Therefore, two issues were pertinent;

- **Aqua Salveo** was needed to demonstrate a killing efficiency with regards to bacteria, fungi and possibly viruses.
- As **Aqua Salveo** is intended for people, it needed to be safe, even when used on a regular basis – and, even by the elderly and small children.

*(A different combination of these ions is used to purify spas, pools, etc.)*

**Aqua Salveo contains no chlorine or bleaches.**

**"Ionisation" is not a new science and the process is well documented. The makers of Aqua Salveo researched and developed a method of combining the correct balance of food-grade ions in a solution to add to drinking water. IT IS EASY TO USE!**

**AQUA SALVEO IS SPECIFICALLY MADE FOR HUMAN CONSUMPTION AND IS SAFE TO USE AS DIRECTED.**

## **ODOURLESS & TASTELESS !**

The product is a concentrated liquid that needs to be diluted by adding 3 drops (0.09ml) per litre of water, for drinking, bathing and household cleaning. The treatment ranges from as little as 1 litre to thousands of liters and when applied as suggested, the water will remain disinfected for 24 months and will tolerate temperatures as high as 35°C/95°F.

The product's active ingredients include zinc, silver and copper ions (not heavy metals).

These minerals have additional health benefits that may improve the treatment of the following:

- Athlete's foot
- Eczema
- Minor cuts and bruises
- Skin infestations
- Bedsores
- Septic wounds
- Symptoms of thrush
- Sunburn and minor burns
- Fever blisters
- Acne
- Mosquito bites, etc.

(To page 2 .... )

**Suitable for:**

- \* **Domestic drinking and cooking water for general healthy well-being.**
- \* Disinfecting drinking water during disaster recovery, floods and emergency situations
- \* Home based care-workers in situations where there is little or no water
- \* Food industry, **to increase shelf life of fresh products** after rinsing in final rinse water
- \* Agricultural industry (e.g. Water for animals, birds, etc.)
- \* **Treatment of water that needs to be stored (Yachts, boats, RV's, etc.)**
- \* Cleaning/rinsing and sanitizing water storage containers
- \* Disinfecting and sanitizing water fountains
- \* Horticultural industry (e.g. Hydroponics and planting - prevents root-rot)
- \* Industrial food industry
- \* Travellers
- \* Paramedics

**Benefits:**

- \* Contains minerals for your well-being
- \* Contains no chlorine or bleaches
- \* Easy to use
- \* **Odourless and tasteless**

**NOTE FOR SAILORS:**

- Will dramatically increase the shelf life of fruit and vegetables when these are rinsed with a solution of **Aqua Salveo** @ 3 drops per liter before storage.
- Desalinated water should also be treated with **Aqua Salveo** as a desalinator does not fully sanitize the water.

**Water sanitation:**

\* **AQUA SALVEO™** Water Disinfectant has been tested as effective against the following bacteria commonly found in water:

- Somatic Coliphages
- Virocideal tested on Bactereophages
- Candida albicans
- Enterobacteriaceae group
- Erchirichia coli
- Salmonella typhimurium
- Shigella dysenteria
- Areomonas spp
- Enterococcus faecalis
- Pseudomonas aeruginosa
- Staphylococcus aureus
- Streptococcus pneumonia
- Haemophilus influenza
- Vibrio parahemolyticus
- Vibrio cholerae 100,000/ml (Cholera is an acute intestinal infection caused by ingestion of food or water contaminated with the bacterium Vibrio cholerae" - **World Health Organization**)
- Somatic coliphages
- Virocideal tested on Bactereophages

**Packing sizes:** (for 3 drops per liter)

10 ml - treats 100 liters  
30 ml - treats 300 liters  
100 ml - treats 1,000 liters  
500 ml - treats 5,000 liters single dose  
1 L - treats 10,000 liters single dose  
5 L - treats 50,000 liters single dose  
25 L - treats 250,000 liters single dose

Store **Aqua Salveo** in a cool dry place out of direct sunlight – the shelf-life is 5 years.

**Why use Aqua Salveo™ Water Disinfectant?**

- The copper, silver, and zinc ions disrupt the enzyme balance of bacteria and viruses. Most, if not all, of the chemicals used to purify water are caustic and or toxic and many are now thought to be Carcinogenic. Copper, silver, and zinc are safe for drinking water. The balance of ions in **Aqua Salveo** is safe (and beneficial), even for young children, to use for extended periods.
- **Aqua Salveo™** Water Disinfectant disinfects water by killing micro-organisms and with only one application, water remains stable and pathogen free for up to twenty four months, if applied correctly.
- The benefit from using **Aqua Salveo™** is improved hygiene resulting in improved health and increased shelf life of potable water.
- Most common water treatment products are Chlorine based that interacts with the organic material in the water and are sometimes carcinogenic and effects sensitive groups of people. **Aqua Salveo™** is not Chlorine based.
- Water filters are expensive and for them to be effective people have to be educated on how to use the system, needs access to an infrastructure that could supply the filters.
- Chlorine tablets are expensive and the taste of the final product is not pleasant and not odourless.
- Jik or Javel (bleaches) are products that have not primarily been created for Human consumption – but for bleaching stains out of fabric. It is a cheap solution for a global problem with a bad taste and bad side-effects for the consumer over an extended period.
- Boiling of water before use is practical for people with small households where use and demand of water is low. Yet, it is not affordable for poor people who cannot afford fuel to boil water daily.
- Soap in hand washing basins does not guarantee that the next person using the same water will not contract diseases from the same water.
- **Aqua Salveo™** Water Disinfectant was specifically created to address a need for Disinfecting water – where there is no formal infrastructure for water treatment or to assist the need that arises where current structures are outdated and cannot cope with the supply – as a result of lack of funds or disaster situations.

*\* We have received a number of positive and life changing testimonials that are available on request*

### **What is Aqua Salveo™ Water Disinfectant made of and how does it work?**

**Aqua Salveo™** Water Disinfectant is a mineral salt solution (not the heavy metals) and is manufactured within the ISO9001 quality management system using food grade quality minerals. Each mineral provides health benefits such as:

#### **Zinc**

- \* Activates white blood cells to fight infection.
- \* Drives everything from manufacturing DNA, wound healing, maintaining a strong immune system, to fighting colds, influenza, and other infections.
- \* The human body does not produce zinc on its own, so it must be obtained from outside sources Zinc works as an immune booster, enhances fertility, digestion, etc.
- \* Helps the pancreas make insulin and keep normal sugar levels.
- \* Essential for good memory.

#### **Copper**

- \* Maintains immunity and fertility.
- \* Formation of melanin.
- \* Promotion of consistent pigmentation.
- \* It is believed to play a role in preventing high blood pressure, heart arrhythmia, oxidation of the cells and keeping cholesterol low.
- \* Copper is used by the body to manufacture numerous enzymes, many of which work as antioxidants.

#### **Silver**

- \* Disinfects and kills most micro-organisms.
- \* Broad-spectrum disinfecting antibiotic alternative that can significantly reduce the severity and length of almost any type of bacterial infection.
- \* Tests show that silver ions are toxic to all tested species of bacteria, fungi, protozoa, parasites and many viruses.
- \* Silver ions have proven useful against many different infectious conditions and are non-toxic in its micro-concentrations.

*(We take all these minerals in our daily multi-vitamin pill, right?)*

### **Is Aqua Salveo™ Water Disinfectant safe to use?**

**Aqua Salveo™** is safe and non-toxic for humans and animals when used according to the manufacturers instructions (does not harm the good bacteria in the stomach because of the miniscule amounts used to disinfect the water).

### **How does Aqua Salveo™ improve the quality of my life?**

Drinking clean water and improving your hygiene will result in improved health.

#### **Food packaging and preservation**

- \* **Aqua Salveo™** Water Disinfectant is currently used in the preparation and packaging of fresh vegetables, extending the packed product's shelf life by up to 9 days.
- \* The company is currently in the process of testing the use of **Aqua Salveo™** Water Disinfectant in the meat industry and is expecting the same results.

#### **Agricultural and Horticultural industry**

- \* Informal trials have been performed in the use of **Aqua Salveo™** Water Disinfectant in the Agriculture industry.

(To Page 5 .... )

**Travelling and Outdoors Activities**

\* **Aqua Salveo™** Water Disinfectant is sold to retailers trading in the Travel and Outdoors Activities industry, selling the product to hikers and travellers using it in the areas where water is not safe to drink.

**AQUA SALVEO® REGISTRATIONS:**

- \* A product of South Africa
- \* Patented product
- \* Trademarked product
- \* Complies with the **WHO** Standards for Water Purification.
- \* South African Bureau of Standards – **SABS 1827**. (The safety of water treatment chemicals for the use in the food industry).
- \* Member of JCCI (Johannesburg Chamber of Commerce and Industry)
- \* Registered in Zimbabwe – Standards Organisation
- \* Saudia Arabia Water Board Registration – SAFA
- \* Food and Drug Board Registration, Ghana – Registration number FDC/c.-8021
- \* Italy, Ministry of Health – Protocol number 198961. This is also our temporary EU "EUROPEAN UNION" number.

**The South African Bureau of Standards (SABS)**

**Aqua Salveo** is manufactured in an internationally approved ISO 9001:2000 facility. After stringent effectiveness tests, the **SABS** awarded **Aqua Salveo** the SABS 1827 certified quality mark. All tests have been done in international accredited laboratories and is marketed nationally and internationally. All formulations are verified and approved by the SABS.
